I. INTRODUCTION

A. RISK FACTORS

i. Standard Risk Factors:

- 1) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- 2) As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- 3) Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- 4) Navi Nifty 50 Index Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- 5) The settler of the Mutual Fund is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- 6) Navi Nifty 50 Index Fund is not a guaranteed or assured return Scheme.
- 7) The Sponsor, their affiliates, associates, subsidiaries, the Mutual Fund and the AMC may invest directly or indirectly in the Scheme, over a period of time; subject to the SEBI (Mutual Funds) Regulations. These entities may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, Redemption of Units held by such entities may have an adverse impact on the Scheme because the timing of such Redemption may impact the ability of other Unit holders to Redeem their Units.
- 8) Different types of Securities in which the Scheme would invest as given in this Scheme Information Document carry different levels and types of risks. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. For example, equity and equity related securities carry a higher amount of risk than debt securities. Investment decisions made by the AMC may not always be profitable

ii. Scheme Specific Risk Factors

The Scheme is subject to the risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, return and/or its ability to meet its objectives.

Risks associated with Equity and Equity Related Instruments:

Investments in equity and equity related instruments involve a degree of risk, both company specific and market risks and thus investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

The scheme will predominantly invest in equity and equity related securities diversified over various sectors. Thus, any price fluctuation for these securities may adversely affect the NAV of the units issued

NAVI NIFTY 50 INDEX FUND

under the Scheme. The same may also lead to out-performance or under-performance of the scheme against Nifty 50 which is the benchmark index for the scheme.

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

The Scheme may invest in securities which are not listed on the stock exchanges. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks of Total Return

Dividends are assumed to be reinvested into the Nifty 50 Index after the ex-dividend date of the constituents. However in practice, the dividend is received with a lag. This can lead to some tracking error.

Index Fund Risk

The Scheme being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Passive Investments

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Risks associated with Fixed Income securities:

The following are the risks associated with investment in Fixed Income securities:

NAVI NIFTY 50 INDEX FUND

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risks associated with investing in Tri-Party Repos Segments

The mutual fund is a member of securities and Tri-Party Repos segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-Party Repos segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of

NAVI NIFTY 50 INDEX FUND

another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Tracking Error Risk

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.

Risk Factors relating to Portfolio Rebalancing

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme beyond 7 days then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

Risks associated with Derivatives Transactions

Systematic Risk: Systematic Risk is the risk associated with the entire market. Unlike unsystematic risk, it is not linked to a specific security or sector. Systematic risk is a market risk which can be due to macro-economic factors, news events, etc.

Mark to Market Risk: This risk is on account of day to day fluctuations in the underlying Security and its derivative instrument, which can adversely impact the portfolio.

Credit Risk: The credit risk is the risk that the counter party will default in its obligations and is generally small as in a Derivative transaction there is generally no exchange of the principal amount.

Interest rate risk: Derivatives carry the risk of adverse changes in the price due to change in interest rates.

Basis Risk: When a security is hedged using a Derivative, the change in price of the security and the change in price of the Derivative may not be fully correlated leading to basis risk in the portfolio.

Liquidity risk: During the life of the Derivative, the benchmark might become Illiquid and might not be fully capturing the interest rate changes in the market, or the selling, unwinding prices might not reflect the underlying assets, rates and indices, leading to loss of value of the portfolio.

Model Risk: The risk of mis-pricing or improper valuation of Derivatives.

Trade Execution: Risk where the final execution price is different from the screen price, leading to dilution in the spreads and hence impacting the profitability of the reverse arbitrage strategy.

NAVI NIFTY 50 INDEX FUND

Systemic Risk: For Derivatives, especially OTC ones the failure of one Counter Party can put the whole system at risk and the whole system can come to a halt.

The scheme may invest in various derivative products in accordance with and to the extent permitted under the regulations from time to time.

Derivatives are financial contracts of pre-determined fixed duration, like stock Futures /options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as: Equities, Interest rates, Exchange rates.

Derivative products are specialized instruments that require investment techniques and risk analysis which are different from those associated with stocks and other traditional securities.

Derivatives are highly leveraged instruments and a small price fluctuation in the underlying can have a larger impact on its value. Thus, its use can lead to disproportionate gains or losses to the portfolio. Execution of derivatives instruments depends on the ability of the fund manager to identify good opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of Derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risk factor associated with segregated portfolio

Investor holding units of segregated portfolio may not able to liquidate their holding till the time realisable value is recovered.

Security comprising of segregated portfolio may realise lower value or may realise zero value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

NAVI NIFTY 50 INDEX FUND

Risks factors associated with investments in Repo Transactions in Corporate Bond:

In repo transactions, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

Counter party Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also, the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.

Collateral Risk: Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA or equivalent and above rated money market and corporate debt securities. Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. The fund manager shall then arrange for additional collateral from the counterparty, within a period of 1 business day. If the counterparty is not able to top-up either in form of cash / collateral, it shall tantamount to early termination of the repo agreement.

Risk Control

The risk control process involves reducing risks through portfolio diversification. This diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. There would be regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index.

Nifty 50 Index fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the

NAVI NIFTY 50 INDEX FUND

provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Ultimate Beneficial Ownership details:

SEBI vide its circular no. CIR/MIRSD/2/2013 dated January 24, 2013 further read with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015 and other applicable regulations has prescribed guidelines, for identification of Beneficial Ownership to be followed by the intermediaries. A 'Beneficial owner' is defined as a natural person or persons who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, and includes a person who exercises ultimate effective control over a legal person or arrangement. In this regard, all categories of investors (including all new / existing investors / unitholders) (except individuals, companies listed on a stock exchange or majority-owned subsidiary of such companies) are mandatorily required to provide beneficial ownership details for all investments. Failing which, fund reserves the right to reject applications / subscription requests / additional subscription requests (including switches) / restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. In the event of change in beneficial ownership, investors are requested to immediately update the details with the Fund/Registrar.

Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standards (CRS) requirements:

FATCA is a United States of America ("U.S.") tax initiative that requires all financial institutions to report financial transactions of U.S. persons including entities in which U.S. persons hold a substantial ownership, etc. to the relevant tax authorities. It was introduced by the United States Department of Treasury and the US Internal Revenue Service ("IRS"), the purpose of FATCA is to encourage better tax compliance by preventing U.S. persons from using financial institutions outside U.S. to avoid U.S. taxation on their income and assets.

Further, similar to FATCA, G20 and OECD countries have developed CRS on Automatic Exchange of Information (AEOI). CRS requires the financial institutions of the source jurisdiction to collect and report information to their tax authorities about account holders "resident" in other countries.

The Indian Government signed an Inter-Governmental Agreement ("IGA") with the U.S. on July 9, 2015 to implement the FATCA in India. In addition, India also signed the OECD's Model Competent Authority Agreement for tax information sharing in accordance with multilateral Common Reporting Standard ("CRS") on June 3, 2015. India had committed to implement CRS and the same has been implemented from January 1, 2016. The Central Board of Direct Taxes has inserted Section 285BA of the Income Tax Act, 1961 along with Rules 114F to 114H (FATCA-CRS Rules), as part of the Income-tax Rules, 1962. These Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, will relay that information to the IRS and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Navi Mutual Fund. In relevant cases, information will have to be reported to tax authorities i.e. CBDT. Towards compliance, we may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Navi Mutual Fund has taken appropriate measures in order to become FATCA and CRS compliant, with effect from the applicable date as per applicable laws / rules/ regulations. Navi Mutual Fund may also have to comply with other similar laws as and when applicable.

NAVI NIFTY 50 INDEX FUND

SEBI issued its circular no. CIR/MIRSD/2/2015 dated August 26, 2015 inter alia advising intermediaries to take necessary steps to ensure compliance with the requirements specified in the rules and guidelines specified by the Government of India. AMFI also issued its best practices guidelines circular no. 63/2015-16 dated September 18, 2015 on this matter. The AMC and the Mutual Fund are required to adhere to various requirements inter alia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities, as specified under the applicable laws.

Accordingly, the following aspects need to be adhered to :

- With effect from November 1, 2015 all investors will have to mandatorily provide the information and declarations pertaining to FATCA/CRS for all new accounts opened, failing which the application / transaction request shall be liable to be rejected.
- For all new accounts opened by investors, from September 1, 2015 till October 31, 2015, MFs need to obtain relevant FATCA declarations. These details / certification need to be obtained by December 31, 2015, particularly in cases where, after Indicia search, a positive match is found with any US indicia. If self certification is not provided by an investor or the reasonableness of self certification cannot be confirmed, the account is treated as reportable.
- For accounts opened between July 1, 2014 and August 31, 2015, the Government of India vide its press release dated April 11, 2017 has required that all efforts should be made by the AMC to obtain the self-certification from the investor. Further, in case self-certifications are not provided by unitholders till April 30, 2017, the folios would be blocked, which would mean that the AMC would prohibit the unitholder from effecting any transaction with respect to such folios. For pre-existing accounts (as on December 31, 2015 in case of CRS and June 30, 2014 in case of FATCA), specific investors above specified threshold limits would be required to provide self-certification forms.

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should immediately intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

- Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Navi Mutual Fund will be unable to

NAVI NIFTY 50 INDEX FUND

provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

The AMC reserves the right to change/modify the provisions mentioned above in response to any new regulatory development which may require to do so at a later date.

Equity Derivatives:

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instrument on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

SEBI has permitted futures contracts on indices and individual stocks with maturity of 1 month, 2 months and 3 months on a rolling basis. The futures contracts are settled on last Thursday (or immediately preceding trading day if Thursday is a trading holiday) of each month. Currently, the futures are settled in cash. The final settlement price is the closing price of the underlying stock(s)/ index.

Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or up to a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified asset at the agreed price and for this obligation he receives premium. The premium is determined considering number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types, viz:

Call Option - The option that gives the buyer the right to buy specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

Put Option - The right to sell is called put option. A Put option gives the holder (buyer) the right to sell specified quantity of the underlying asset at the strike price. E. WHAT ARE THE INVESTMENT STRATEGIES?

EQUITY INVESTMENT STRATEGY:

The investment objective of the scheme is to achieve return equivalent to Nifty 50 Index by investing in stocks of companies comprising Nifty 50 Index.

The Scheme endeavors to invest in stocks in proportion to the weightages of these stocks in the Nifty 50. The fund will, in general invest a significant part of its corpus in equities; the surplus amount of the fund, not exceeding 5% shall be invested in Cash/Tri-Party Repo, Repo in corporate debt securities & Money Market instruments.

The performance of the Scheme may not be commensurate with the performance of the respective benchmark of the Schemes on any given day or over any given period. Such variations are commonly referred to as the tracking error. The Scheme intends to maintain a low tracking error by actively managing the portfolio in line with the index.

However there is no assurance that all such buying and selling activities would necessarily result in benefit for the Fund.

A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

PORTFOLIO TURNOVER:

The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. The fund manager depending upon the view and subject to trading opportunities, may trade in securities, which will lead to increase in Portfolio Turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to

NAVI NIFTY 50 INDEX FUND

estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

Latest monthly portfolio holding can be obtained on website of Navi Mutual Fund. (www.navimutualfund.com/dnd_statements.php)

Portfolio Turnover:

Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time. Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Navi Nifty 50 Index Fund is a passively managed open-ended index scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty 50 Index. Portfolio Turnover Ratio: Not Applicable during NFO (Since the scheme is a new fund to be launched, the said ratio is Not Applicable during NFO)

INVESTMENT BY THE AMC IN THE SCHEME

In accordance with Regulation 28(4) of SEBI (Mutual Funds) (Amendment) Regulations, 2014 the Sponsor or AMC shall invest not less than 1 % of the amount raised in the NFO or fifty lakh rupees, whichever is less, in the growth option of the scheme and such investment shall not be redeemed unless the scheme is wound up.

In addition to investments as mandated under Regulation 28(4) of the Regulations as mentioned above, the AMC may invest either directly or indirectly, in the Scheme during the NFO and / or Ongoing Offer Period. However, the AMC shall not charge any investment management fee on such investment in the Scheme.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weightage as the securities have in the Underlying Index. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, lack of liquidity, etc.

The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:-

1. Fees and expenses of the Scheme.
2. Cash balance held by the Scheme due to dividend received, subscriptions, redemption, etc.
3. Halt in trading on the stock exchange due to circuit filter rules.
4. Corporate actions
5. The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities shares.
6. Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.
7. Lack of Liquidity.

NAVI NIFTY 50 INDEX FUND

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a.

However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices. There will be no change in the number of units remaining outstanding.
- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated.
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio.
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders.

NAVI NIFTY 50 INDEX FUND

- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly. Based on the circumstances and developments, the AMC may decide to write off the residual value of the segregated portfolio.
- Unitholders may also note that the process followed by the AMC/Trustees regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.

Note :

A. The levy of tax on distributed income payable by Mutual Funds has been abolished w.e.f. April 1, 2020 and instead tax on income from mutual fund units in the hands of the unit holders at their applicable rates has been adopted.

¹ Equity Oriented Funds will also attract Securities Transaction Tax at applicable rates.

² As per the provisions of section 196A which is specifically applicable in case of non-resident unitholders, a withholding tax rate of 20% (plus applicable surcharge and cess) on any income in respect of units of a Mutual Fund credited/ paid to non-resident unitholders shall apply, as section 196A does not make reference to "rates in force" but provides the withholding tax rate of 20% (plus applicable surcharge and cess).

As per the provisions of section 196D of the Act which is specifically applicable in case of FPI/FII, the withholding tax rate of 20% (plus applicable surcharge and cess) on any income in respect of securities referred to in section 115AD(1)(a) credited / paid to FII shall apply. The Finance Act, 2021 inserted a proviso to section 196D(1) of the Act to grant relevant tax treaty benefits with effect from 1 April 2021 at the time of withholding tax on income with respect to securities of FPIs, subject to furnishing of tax residency certificate and such other documents as may be required. The tax computed in case of domestic companies whose income is chargeable to tax under section 115BAA or section 115BAB shall be increased by a surcharge at the rate of 10%.

⁶ Short term/ long term capital gain tax will be deducted at the time of redemption of units in case of NRI investors only. However, as per section 196A of the Act the withholding tax of 20% (plus applicable surcharge and cess) is applicable on any income in respect of units of mutual fund in case of non-residents. Hence, based on language provided in said section, it seems that apart from any income distributed to NRI, withholding tax at 20% may be applicable on capital gains notwithstanding that such capital gains are taxable at a rate lower than 20%.
