I. INTRODUCTION

A. RISK FACTORS

i. Standard Risk Factors:

- 1) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- 2) As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- 3) Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- 4) Navi US Total Stock Market Fund of Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- 5) The settler of the Mutual Fund is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- 6) Navi US Total Stock Market Fund of Fund is not a guaranteed or assured return Scheme.
- 7) The Sponsor, their affiliates, associates, subsidiaries, the Mutual Fund and the AMC may invest directly or indirectly in the Scheme, over a period of time; subject to the SEBI (Mutual Funds) Regulations. These entities may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, Redemption of Units held by such entities may have an adverse impact on the Scheme because the timing of such Redemption may impact the ability of other Unit holders to Redeem their Units.
- 8) Different types of Securities in which the Scheme would invest as given in this Scheme Information Document carry different levels and types of risks. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. Investment decisions made by the AMC may not always be profitable

ii. Scheme Specific Risk Factors

The Scheme is subject to the risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, return and/or its ability to meet its objectives.

- The Scheme may invest predominantly in the units of units of the Vanguard Total Stock Market ETF (VTI) or in the Schwab Total Stock Market Index Fund (SWTSX). VTI employs an indexing investment approach designed to track the performance of the CRSP US Total Market Index, which represents approximately 100% of the investable U.S. stock market and includes large-, mid-, small-, and micro-cap stocks. The Fund invests by sampling the Index, meaning that it

NAVI US TOTAL STOCK MARKET FUND OF FUND

holds a broadly diversified collection of securities that, in the aggregate, approximates the full Index in terms of key characteristics. These key characteristics include industry weightings and market capitalization, as well as certain financial measures, such as price/earnings ratio and dividend yield. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme.

- The Scheme will primarily invest in investing in units of the Vanguard Total Stock Market ETF (VTI) or in the Schwab Total Stock Market Index Fund (SWTSX). For every such investment, the risk factors of the underlying scheme will be relevant and must be treated as risk factors of Navi US Total Stock Market Fund of Fund. The risks in such underlying scheme/s may relate to factors such as performance of underlying stocks, bonds, derivative instruments, offshore investments, interest rates risks, and exchange risks, to name a few.
- To the extent the assets of the Scheme are invested in overseas funds, the performance, risk profile and liquidity of the Scheme will be directly related to those of the underlying funds.
- The funds in which the Scheme invests may not perform in line with the market and may also not achieve its investment objective. In such a situation, the performance of the Scheme could be affected and its ability to achieve its investment objective may be impaired.
- Investments in underlying scheme will have all the risks associated with such schemes including performance of underlying stocks, derivative investments, off shore investments, stock lending, changes in credit rating, trading volumes, settlement periods, price/interest rate risk, volatility & liquidity in money markets, basis risk, spread risk, re-investment risk, etc.
- The investors should refer to the Scheme Information Documents and the related addendum for the scheme specific risk factors and special consideration of the respective Underlying Scheme.
- Since the Scheme proposes to invest in underlying scheme, the Scheme's performance will depend upon the performance of the underlying scheme and any significant underperformance in even one of the underlying scheme may adversely affect the performance of the Scheme.
- Any change in the investment policies or the fundamental attributes of the underlying scheme may affect the performance of the Scheme.
- The Portfolio disclosure of the Scheme may be limited to providing the particulars of the underlying scheme where the Scheme has invested and may not include the investments made by the underlying scheme.
- The investors of the Scheme shall bear the recurring expenses of the Scheme in addition to the expenses of the underlying scheme. Hence the investor under the Scheme may receive lower pretax returns than what they may receive if they had invested directly in the underlying scheme in the same proportions.
- The Portfolio rebalancing may result in higher transaction costs.
- The Scheme's performance may be impacted by exit loads or other redemption charges that may be charged at the time of redemption from the underlying scheme. Since the incidence of exit loads on investments made by the Scheme in underlying scheme of the Fund is based on first-in, first-out principle, it is anticipated that the impact of such exit loads/redemption charges could be minimal during the normal course of functioning of the Scheme.

Risk associated with investing in Vanguard Total Stock Market ETF (VTI) or the Schwab Total Stock Market Index Fund(SWTSX)

a. Investments in the equity shares of the Companies constituting the Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macroeconomic factors like economic and political developments, changes in interest rates, etc.

NAVI US TOTAL STOCK MARKET FUND OF FUND

affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.

b. Listing and trading of the underlying scheme are undertaken on the Stock Exchanges within the rules, regulation and policy of the Stock Exchange and Regulator. Any change in trading rules, regulation and policy by the regulatory authority would have a bearing on the trading of the units of the underlying scheme and its prices.

c. The NAV of the underlying scheme reflect the valuation of its investment and any changes in market value of its investments would have a bearing on its NAV. When the units are traded on the Stock Exchange, the units of the underlying scheme may trade at prices which can be different from the NAV due to various factors like demand and supply for the units of the underlying scheme, perceived trends in the market outlook, etc.

d. Market Risk: The underlying scheme's NAV will react to stock market movements .The value of investments in the scheme may go down over a short or long period due to fluctuations in underlying scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.

e. Index-Related Risk: The underlying scheme invests in CRSP US Total Market Index securities in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the underlying ETF's and or index funds. The Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The underlying ETF's and or Index funds would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The underlying ETF's and or Index funds would not select securities in which it wants to invest but is guided by the Index. As such the underlying ETF's and or Index funds is not actively managed but is passively managed.

There is no guarantee that the underlying ETF's and or Index funds will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective.

f. Management Risk. As the underlying ETF's and or Index funds may not fully replicate the Underlying Index, it is subject to the risk that investment strategy may not produce the intended results.

g. Concentration Risk. The underlying ETF's and or Index funds may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the underlying ETF's and or index funds more than the market as a whole, to the extent that the investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry,group of industries, sector or asset class.

h. Currency Risk: As the underlying ETF's and or Index funds will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the underlying ETF's and or index funds. Thus,returns to

NAVI US TOTAL STOCK MARKET FUND OF FUND

investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.

i. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the underlying ETF's and or Index funds to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the underlying ETF's and or Index funds portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the underlying ETF's and or Index funds.

j. Equity Securities Risk. Equity securities are subject to changes in value and their values may be more volatile than those of other asset classes.

k. Tracking Error Risk: Tracking error is the divergence of the underlying scheme from that of the Underlying Index. Tracking error may occur because of differences between the securities held in the underlying scheme's portfolio and those included in the Underlying Index, pricing differences (including differences between a security's price at the local market close and the intrinsic value of a security at the time of calculation of the NAV), transaction costs, the underlying Fund's holding of cash, changes to the Underlying Index or the need to meet various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Risks associated with Fixed Income securities:

The following are the risks associated with investment in Fixed Income securities:

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the level at which the security is being traded.

NAVI US TOTAL STOCK MARKET FUND OF FUND

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risks associated with investing in Tri-Party Repos Segments

The mutual fund is a member of securities and Tri-Party Repos segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-Party Repos segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Risk Factors Associated with investing in Foreign Securities:

NAVI US TOTAL STOCK MARKET FUND OF FUND

Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.

To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated under the Regulations or by the RBI from time to time.

Overseas investments will be made subject to any/all approvals, conditions thereof as may be stipulated under the Regulations or by RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.

The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Legal and Regulatory Risk - Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Scheme and the investors. Legislation/ Regulatory guidelines could also be imposed retrospectively.

Taxation Risk - Investment in Offshore Funds poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation. The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.

Risk Factors relating to Portfolio Rebalancing

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund

NAVI US TOTAL STOCK MARKET FUND OF FUND

Manager to rebalance the portfolio of the Scheme beyond 7 days then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

Risk factor associated with segregated portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time realisable value is recovered.

Security comprising of segregated portfolio may realise lower value or may realise zero value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks factors associated with investments in Repo Transactions in Corporate Bond:

In repo transactions, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

Counter party Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also, the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.

Collateral Risk: Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA or equivalent and above rated money market and corporate debt securities. Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. The fund manager shall then arrange for additional collateral from the counterparty, within a period of 1 business day. If the counterparty is not able to top-up either in form of cash / collateral, it shall tantamount to early termination of the repo agreement.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these

NAVI US TOTAL STOCK MARKET FUND OF FUND

two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. CIR/MIRSD/2/2013 dated January 24, 2013 further read with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015 and other applicable regulations has prescribed guidelines, for identification of Beneficial Ownership to be followed by the intermediaries. A 'Beneficial owner' is defined as a natural person or persons who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, and includes a person who exercises ultimate effective control over a legal person or arrangement. In this regard, all categories of investors (including all new / existing investors / unitholders) (except individuals, companies listed on a stock exchange or majority-owned subsidiary of such companies) are mandatorily required to provide beneficial ownership details for all investments. Failing which fund reserves the right to reject applications / subscription requests / additional subscription requests (including switches) / restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standards (CRS) requirements:

FATCA is a United States of America ("U.S.") tax initiative that requires all financial institutions to report financial transactions of U.S. persons including entities in which U.S. persons hold a substantial ownership, etc. to the relevant tax authorities. It was introduced by the United States Department of Treasury and the US Internal Revenue Service ("IRS"), the purpose of FATCA is to encourage better tax compliance by preventing U.S. persons from using financial institutions outside U.S. to avoid U.S. taxation on their income and assets.

Further, similar to FATCA, G20 and OECD countries have developed CRS on Automatic Exchange of Information (AEOI). CRS requires the financial institutions of the source jurisdiction to collect and report information to their tax authorities about account holders "resident" in other countries.

The Indian Government signed an Inter-Governmental Agreement ("IGA") with the U.S. on July 9, 2015 to implement the FATCA in India. In addition, India also signed the OECD's Model Competent

NAVI US TOTAL STOCK MARKET FUND OF FUND

Authority Agreement for tax information sharing in accordance with multilateral Common Reporting Standard (“CRS”) on June 3, 2015. India had committed to implement CRS and the same has been implemented from January 1, 2016. The Central Board of Direct Taxes has inserted Section 285BA of the Income Tax Act, 1961 along with Rules 114F to 114H (FATCA-CRS Rules), as part of the Income-tax Rules, 1962. These Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, will relay that information to the IRS and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Navi Mutual Fund. In relevant cases, information will have to be reported to tax authorities i.e. CBDT. Towards compliance, we may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Navi Mutual Fund has taken appropriate measures in order to become FATCA and CRS compliant, with effect from the applicable date as per applicable laws / rules/ regulations. Navi Mutual Fund may also have to comply with other similar laws as and when applicable.

SEBI issued its circular no. CIR/MIRSD/2/2015 dated August 26, 2015 interalia advising intermediaries to take necessary steps to ensure compliance with the requirements specified in the rules and guidelines specified by the Government of India. AMFI also issued its best practices guidelines circular no. 63/2015-16 dated September 18, 2015 on this matter. The AMC and the Mutual Fund are required to adhere to various requirements interalia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities, as specified under the applicable laws.

Accordingly, the following aspects need to be adhered to:

- With effect from November 1, 2015 all investors will have to mandatorily provide the information and declarations pertaining to FATCA/CRS for all new accounts opened, failing which the application / transaction request shall be liable to be rejected.
- For all new accounts opened by investors, from September 1, 2015 till October 31, 2015, MFs need to obtain relevant FATCA declarations. These details / certification need to be obtained by December 31, 2015, particularly in cases where, after Indicia search, a positive match is found with any US indicia. If self certification is not provided by an investor or the reasonableness of self certification cannot be confirmed, the account is treated as reportable.
- For accounts opened between July 1, 2014 and August 31, 2015, the Government of India vide its press release dated April 11, 2017 has required that all efforts should be made by the AMC to obtain the self-certification from the investor. Further, in case self-certifications are not provided by unitholders till April 30, 2017, the folios would be blocked, which would mean that the AMC would prohibit the unitholder from effecting any transaction with respect to such folios. For pre-existing accounts (as on December 31, 2015 in case of CRS and June 30, 2014 in case of FATCA),

NAVI US TOTAL STOCK MARKET FUND OF FUND

specific investors above specified threshold limits would be required to provide self-certification forms.

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should immediately intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income there from, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

- Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Navi Mutual Fund will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change. Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

The AMC reserves the right to change/modify the provisions mentioned above in response to any new regulatory development which may require doing so at a later date.

2. Schwab Total Stock Market Index Fund

Investment Objective: The fund’s goal is to track the total return of the entire U.S. stock market, as measured by the Dow Jones U.S. Total Stock Market Index SM.

Investment Strategy: To pursue its goal, the fund generally invests in stocks that are included in the Dow Jones U.S. Total Stock Market Index†. It is the fund’s policy that under normal circumstances it will invest at least 80% of its net assets (including, for this purpose, any borrowings for investment purposes) in these stocks; typically, the actual percentage is considerably higher. The fund will notify its shareholders at least 60 days before changing this policy. The fund generally gives the same weight to a given stock as the index does. However, when the investment adviser believes it is in the best interest of the fund, such as to avoid purchasing odd-lots (i.e., purchasing less than the usual number of shares traded for a security), for tax considerations, or to address liquidity considerations with respect to a stock, the investment adviser may cause the fund’s weighting of a stock to be more or less than the index’s weighting of the stock. The fund may sell securities that are represented in the index in anticipation of their removal from the index, or buy securities that are not yet represented in the index in anticipation of their addition to the index

PORTFOLIO TURNOVER:

NAVI US TOTAL STOCK MARKET FUND OF FUND

The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. The fund manager depending upon the view and subject to trading opportunities, may trade in securities, which will lead to increase in Portfolio Turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices. There will be no change in the number of units remaining outstanding.

NAVI US TOTAL STOCK MARKET FUND OF FUND

- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated.
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio.
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders.
- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly. Based on the circumstances and developments, the AMC may decide to write off the residual value of the segregated portfolio.
- Unitholders may also note that the process followed by the AMC/Trustees regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.
